

### **Notice of Community Survey – Northern Warren County**

Warren County is working with the Upper Cumberland Development District (UCDD) to apply for a 2021 Community Development Block Grant through the state of Tennessee. The proposed project to purchase a new fire apparatus will improve fire protection in the area served by North Warren Fire Department. As part of this application process, the community is required to complete a Target Area Survey related to household information. In January and February 2021, UCDD staff will be conducting these surveys of residents who live in the northern Warren County area. Surveys will be conducted by phone. Callers will request household information, including a household income level estimate, but they will NOT ask for social security numbers or other financial information. All information received will remain confidential and is used only to determine the community's eligibility for this grant. If there is any question of the validity of a caller, please contact Warren County Executive Jimmy Haley's office at (931) 473-2505.
